Balance of Payments of the Kyrgyz Republic

«Balance of payments of the Kyrgyz Republic» is issued by the National Bank of the Kyrgyz Republic. The legislative basis for the balance of payments are the Law of the Kyrgyz Republic as of July 29, 1997 No. 59 “On the National Bank of the Kyrgyz Republic” and the Resolution of the Government of the Kyrgyz Republic as of November 3, 2000 No. 645 “On measures to improve statistics of the balance of payments of the Kyrgyz Republic”. This document reflects last tendencies in external sector development and shows statistical data on the balance of payments, external trade, international reserves, external debt and international investment position, as well as construction methods of balance of payments and informational database. This document is published 4 times a year - in January, May, July and October and has 3 language versions: Kyrgyz, Russian and English.

This publication includes revised data on overdue payments since 2008, and final data on foreign investments for the fourth quarter of 2012. The data for the first quarter of 2013 in the “Services” article are considered as preliminary due to updating of record keeping methodology.

Last day for update of data for the present publication is July 20, 2013.

Annotation symbols and notes:

- ... means the absence of data;
- means, that indicators/ratios are equal to 0 (zero) or insignificant;
- is set between years or months (e.g., 1994-1996 or January-June) and means, that all years and months are covered by the shown dates.

Deviations in last digits may occur because of rounding numbers when summing up.

In regard with the possible changes in accounting methods or historical data, which are used in the given document, correction of earlier published data is acceptable. Therefore, 10 years period can be accounted as «open period».

Other publications of the National Bank of the Kyrgyz Republic

Annual Report of the National Bank of the Kyrgyz Republic

This document is an overall report of the National Bank for the last year. It includes summary on economic development of the republic and monetary policy, as well as the National Bank financial statements, general information and statistical reviews. It is published in 3 languages: Kyrgyz, Russian and English.

Bulletin of the National Bank of the Kyrgyz Republic

Informational publication includes statistical data on the basic macroeconomic indicators and economy sectors of the Kyrgyz Republic. It is published in 3 languages: Kyrgyz, Russian and English.

Inflation Report

This publication describes dynamics of consumer prices in the republic and regions, analysis of the main inflation factors, informs about the National Bank decisions on monetary policy and provides with inflation preview for the oncoming period. It is published quarterly in Kyrgyz, Russian and English.

Banking System Development Trends

The given document provides analysis of the banking system status of the Kyrgyz Republic as a financial intermediary, as well as the banking system stability by segment. It is published twice a year in Kyrgyz, Russian and English.

National Bank Normative Acts

The purpose of the document, called «Normative Acts of the National Bank of the Kyrgyz Republic» is to publish normative acts of the National Bank in order to provide commercial banks and public with normative acts of the National Bank and official information on the National Bank activity, as well as propaganda of the Kyrgyz Republic law. Presumable publication frequency is once a month in Kyrgyz and Russian languages.

Press-Release of the National Bank of the Kyrgyz Republic

«Press-release of the National Bank» describes current events, which take place in National Bank and provides with the major data on the financial market. It is published weekly in Kyrgyz and Russian languages.

Publications of the National Bank are distributed in accordance with the specifications approved by the Chairman of the National Bank. They can also be found on the National Bank web-site: <http://www.nbkr.kg>.

THE CURRENT STATUS OF THE BALANCE OF PAYMENT

The deterioration in the status of the balance of trade and income resulted in increase of

Chart 1: Current Account

in percent of GDP

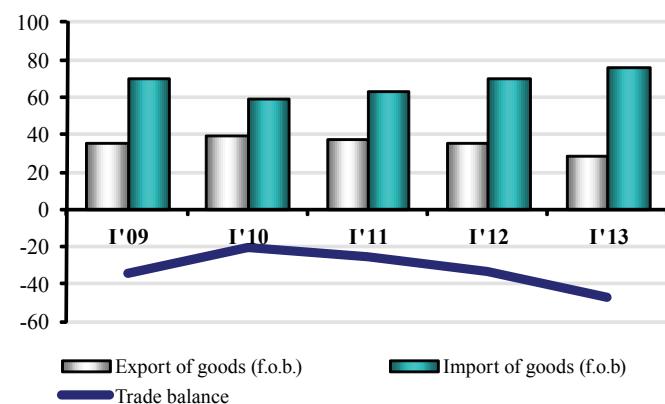

TRADE BALANCE

In the first quarter of 2013, **the trade balance** of the Kyrgyz Republic has formed with a negative balance and amounted to USD 686.8 million, having increased by 25.6 percent compared to the corresponding period of 2012.

Chart 2: Trade balance of the Kyrgyz Republic

in percent of GDP

of USD 397.8 million, having decreased by 8.2 percent as compared to the corresponding index in the first quarter of 2012. Export of goods excluding additional estimates in FOB prices constituted USD 302.8 million.

the current account deficit to USD 488.1 million, despite ongoing growth rates of cash inflows under the “current transfers” article and decrease of negative balance of services. The current account deficit was partially financed by net capital inflow on the capital transactions account and financial operations in the amount of USD 235.3 million.

The main reasons for deterioration in the trade balance are the following factors:

- decline in the export of gold;
- growth in the import of petroleum products.

The **external trade turnover** in FOB prices in the reporting period increased by 4.9 percent and in terms of value amounted to USD 1 482.4 million.

Export of goods in FOB prices including additional estimates of the NSC and the NBKR has formed in the amount

¹ Export of on-bord stock

The main factor of decline in exports was reduction of gold supplies (by 24.4 percent), occupying 30.7 percent of the total volume of exported goods in the first three months of the current year. Meanwhile, decrease in the physical volume of precious metal exports was accompanied by reduction in world prices for gold in the reporting period¹.

Export, excluding gold, constituted USD 210.0 million², having decreased by 2.5 percent, compared to the corresponding index of January-March 2012. In the reporting period, change in price and physical volume of ten largest goods, the share thereof constituted more than 40.0 percent of export excluding gold, had a significant impact on the dynamics of export excluding gold (see Table 1).

The most part of the country's export is the products of **processing industry** (metallurgical, textile and garment industry) and agriculture.

Export of gold decreased by 22.1 percent in kind and by 24.4 percent in terms of value, despite increase in the metallurgical production by 44.1 percent³, primarily conditioned by growth of gold output. The peak supply of gold for the same periods of the last 5 years was in the first quarter of 2011 (USD 281.3 million), against which the fall in the volume of supplies to USD 92.8 million in the reporting period was significant (decrease by 67.0 percent). The physical volume of export of specified products decreased by 22.1 percent, while average export prices decreased by 2.9 percent.

¹ In January-March 2013, the average world price for 1 gold ounce amounted to USD 1 632.5 million, having decreased by 3.5 percent, compared to the corresponding period of 2012; source: Reuters.

² In FOB prices, excluding additional estimates of the NBKR and the NSC; in the first quarter of 2013, export, excluding gold with additional estimates of the NBKR and the NSC constituted USD 305.0 million.

³ "Social and economic situation in the Kyrgyz Republic (January-March 2013)", NSC.

	<i>mil. of US dol.</i>	0,9	1,0	3,5	1,3	1,6

* in FOB prices, excluding estimates of NBKR and NSC

In the reporting period, increase in supplies was observed on other exported products of metallurgical production, excluding cast iron and steel.

In the first quarter of the current year, there was decrease of production output⁴ and export of certain products of **textile and garment industry** due to decline in demand for products of garment industry in the foreign market and change in the rules of goods' import to the territory of the Customs Union member-countries. In particular, the export of articles of apparel and clothing accessories decreased by 29.2 percent and amounted to USD 18.9 million. The largest decline of export in this sector was observed in the "women's and girls' apparels of textile fabrics" article, the volume thereof decreased by 21.8 percent (by USD 3.3 million) and "women's and girls' apparels, knitted or crocheted" (decrease by USD 61.1 million or USD 1.8 million).

⁴ According to the NSC, in January-March 2013, textile and garment industry output decreased by 22.9 percent.

Table 3: Export of major products of clothing manufacture*

Other articles of apparel and clothing accessories	<i>mil. of US dol.</i>	0,1	0,7	1,0	2,2	0,3

* in FOB prices, excluding estimates of NBKR and NSC

It should be noted, that average export prices decreased almost on all types of apparels, excluding women's and girls' apparels, knitted or crocheted.

At the end of the first three months of 2013, real growth of **agricultural** output constituted 1.5 percent⁵. Thus, in the reporting period export of fruits and nuts increased by 11.2 percent (or by USD 0.9 million), live animals – by 32.9 percent (or by USD 0.7 million), meat and meat products – by 56.2 percent (or by USD 0.6 million), food products not included in other categories – by 44.8 percent (or by USD 0.3 million), products from cereals and flour – by 6.4 percent (or by USD 0.1 million). It should be noted that growth in the supplies of aforementioned goods was provided by increase in their physical volume and export prices. Moreover, export of diary products was almost stopped (decrease by USD 5.8 million), there was decrease in the export of cotton (by 50.3 percent or USD 6.7 million), vegetables (by 10.3 percent of USD 1.9 million), skins of bovine or equine hides and rawhide (by 28.8 percent or USD 0.9 million). It should be noted that decrease in the supplies on the aforementioned positions was primarily due to decline of the physical volume.

⁵ “Social and economic situation in the Kyrgyz Republic (January-March 2013)”, NSC.

* in FOB prices, excluding estimates of NBKR and NSC

In the reporting quarter, 19.2 percent of export was recorded **re-export**⁶, which amounted to USD 58.0 million, having increased by 44.7 percent as compared to the first quarter of 2012. The basis for re-export consisted of machinery and equipment, as well as their spare parts, inorganic substances, cast iron and steel, and other products.

⁶ Re-export is the export of foreign origin goods from the country (earlier manufactured in other countries or imported), where they were imported without any significant transformations, compared to their condition in which they were initially imported.

Currently, the National Bank carries out activities towards more complete record keeping of re-export, which was not covered by official statistics⁷.

Based on the results of the first quarter of the current year, particular changes were observed in **the geographical structure**.

Despite decline in the gold exports, Switzerland remains the major trading partner of the country, occupying 30.8 percent of re-export. Growth in export of clothes, other inorganic substances and rolled grass affected increase in the share of Kazakhstan from 16.3 to 21.6 percent. In the first quarter of the current year, the volume of re-export to Uzbekistan amounted to USD 43.3 million (14.3 percent). In the reporting quarter of the current year, the Russian Federation, being among three major trading partners of the Kyrgyz Republic in the corresponding periods of the last years, was the fourth (12.1 percent), primarily, due to decline in the supplies of articles of apparels and clothing accessories. Generally, during the reporting period, the Kyrgyz Republic exported products to 66 countries of the world (for reference, in the fist quarter of 2009 – to 50 countries).

The geographical distribution of the exported goods indicated that, excluding gold, the CIS countries are the main markets for domestic goods. High geographic concentration is evident on almost all commodities and commodity groups, primarily on gold, vehicles for cargo transportation and other inorganic substances, more than 98.0 percent of their supplies are carried out to one country. The consequence thereof may be the dependence of foreign trade of the Kyrgyz Republic on domestic production of separate kinds of goods, the economic situation in the country and trade policies of individual countries.

⁷ In particular, in 2012, the NBKR performed additional estimates of unofficial re-export of light petroleum products to the neighboring countries (see publication “Balance of payment of the Kyrgyz Republic for 2012”).

NSC data at c.i.f. prices

In the reporting year, mineral fuel had the largest share **in the commodity structure** of import, which remained at the level of 25.0 percent in the corresponding periods of the last two years. The petroleum products have the major share in this group.

In the reporting period, there was increase in the volume of imported **petroleum products** by 14.9 percent (or by USD 33.0 million). The aforementioned growth resulted from increase in the physical volume of import by 15.1 percent compared to the corresponding indices of January-March 2012, while average export prices for imported petroleum products decreased by 0.2 percent.

Table 8: Import of petroleum products *

(mil. of US dollars)

*NSC data at c.i.f. prices

Besides oil, petroleum and lubricants, a significant share in this group is occupied by natural gas and coal, their supplies decreased by 1.5 and 21.0 percent respectively.

The share of imported machinery and transportation equipment decreased by 1.6 percentage points and constituted 25.1 percent of import, despite increase of the cost amount by 3.4 percent in this group. In the reporting period, despite growth of the major share in the commodity categories of this group, decrease in the import of pre-owned passenger cars, vehicles for cargo transportation, electrical wire telephone sets, and some other goods had a restraining influence on the trend of the aforementioned group of goods.

It should be emphasized that some goods of this group are partially imported for further re-export: vehicles for cargo transportation and special purpose motor vehicles, spare parts and accessories of the motor vehicles, aircrafts and associated equipment, etc.

The share of manufactured goods, classified by the type of material did not suffer significant changes and constituted 14.7 percent of the total volume of imported goods. More than one fourth of this group is occupied by cast iron and steel, the import thereof in the reporting quarter of 2013 increased by 34.0 percent compared to the base period. The other significant goods of this group include rubber tires, textile fabrics, various paper and metal products, wood, etc. In the reporting year, growth of cost amount was observed on almost all imported large goods of this group.

According to the results of the first three months of 2013, import in the “food products and live animals” group increased by 3.4 percent and up to USD 131.8 million. The dynamics of import of this group was predetermined by increase in imports of such large commodity categories as cereals, flour, food products and not included in other categories coffee, tea, cocoa, and their products. Moreover, there was decrease in the import of meat, meat products, sugar and other goods.

*NSC data at c.i.f. prices

There were not significant changes in the **geographic distribution** of import in the reporting year.

The country's dependence on energy carriers, consumer goods and some types of raw materials condition the dominant share of these goods imported from Russia (35.6 percent), China (17.0 percent) and Kazakhstan (11.0 percent). Generally, import in the reporting period was carried out from 113 countries of the world (in the first quarter of 2009 – 96 countries).

Import of basic food products was generally carried out from the CIS countries. The largest groups of food products, such as cereals and their products, sugar, vegetable oils and other food products are imported from these countries. Petroleum products are also supplied from the CIS countries.

The share of non-CIS countries is more evident in the structure of imported non-food consumer products: the aggregate share of China and Turkey in the supplies of clothing reached 95.8 percent, in the import of footwear – 86.7 percent. The import of cars from Japan, the USA and Germany constitutes 45.9 percent. Moreover, rather strong volatility in the volumes of imported cars should be emphasized in the dynamics for the corresponding periods of the last years. For example, imports of cars from Japan and Germany, the share thereof constituted 55.0 percent of the import in this position in the first quarter of 2012, decreased in the reporting period of the current year, thereby resulting in decrease of their share. It, besides increase in its cost amount of import, resulted in increase of the share of the USD, Belarus and China.

BALANCE OF INTERNATIONAL SERVICES⁸

The increased volume of foreign trade in the Kyrgyz Republic was supported by increase in the turnover of international services, which, according to the results of the first quarter of 2013, increased by 32.7 percent, reaching the level of USD 816.2 million.

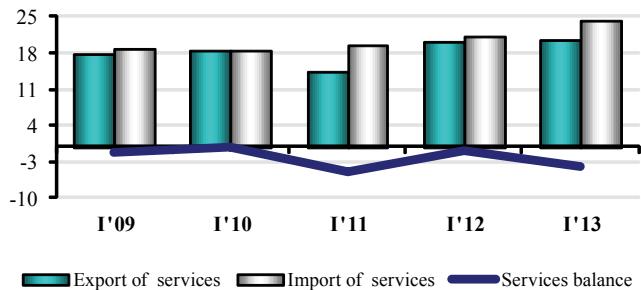

Chart 3: External service and goods trade*
(in millions of US dollars)

* including estimate of NBKR and NSC

corresponds to 92.4 percent of goods export. **Import of goods** amounted to 41.4 percent of import of goods and formed in the amount of USD 448.8 million.

Chart 4: Balance of International services
in percent of GDP

the imports of services, connected with travels (growth by 2.3 times), and the services provided to foreign nationals during their stay in the territory of the Kyrgyz Republic (growth by 2.2 times).

In the first quarter of the current year, the balance of transportation services was traditionally negative in the amount of USD 88.0 million, having decreased by 1.3 percent compared to January-March of the last year. Moreover, decline in the turnover of transportation services was observed due to decrease in the export and import of aforementioned services. Decrease in the volume of transportation services provided by non-residents (by 13.4 percent) was primarily due to decline in the export of aircraft and automobile transportation services (by 12.0 and 56.5 percent respectively). The same types of services predetermined dynamics in the imports of transportation services (decline by 5.1 percent), having decreased by 23.3 and 17.2 percent respectively.

Balance of international services (neutral presentation of the balance of payment) developed negative and constituted USD 81.3 million, having decreased by 34.2 percent compared to the deficit of the balance of services in the corresponding period of the last year (USD 123.7 million). At that, the outpacing growth in the exports of services (49.5 percent) was indicative compared to the increase in their import (by 21.5 percent).

In the reporting period, **export of services** reached USD 367.5 million, which **import of services** amounted to 41.4 percent of

In the reporting period, the largest articles, which constituted 95.3 percent of the total turnover of international services, were travels, transportation and business services.

The balance of the “travels” article formed with a deficit in the amount of USD 0.5 million against its positive value in the first quarter of 2012 (USD 1.5 million). Moreover, growth was observed in

⁸ In June 2013, the NSC revised the data of the services in the dynamics since 2008. The NBKR used the data revised by the NSC since the first quarter of 2013. Amended historical data will be published by the NBKR in the next publication “Balance of payment of the Kyrgyz Republic.”

Net export of business services, which value remained not stable, formed in the reporting period with a positive balance in the amount of USD 9.8 million (USD 40.2 million with a negative value in the first quarter of 2012), which resulted in outpacing decrease in the import of business services (by 71.9 percent) compared to their export (by 28.1 percent). The main factor, which influenced the decline of business services, was significant decrease of consultation services provided to the residents of the Kyrgyz Republic. Decrease in the export of aforementioned services is conditioned by decline in the export of services on land and real estate leasing.

INCOME

In the first quarter of 2013, the balance of “income” article has traditionally formed negative and constituted USD 119.6 million, having increased by USD 72.1 percent as compared to the corresponding index of January-March 2012.

This trend is mainly due to increase of income of direct foreign investors from investing activity in Kyrgyzstan, which is reflected in the growth of reinvested profit of enterprises from USD 43.6 to 93.7 million (growth by 2.1 times). The volume of distributed income of resident companies in the form of dividends for the benefit of direct foreign investors decreased by 15.5 percent and amounted to USD 8.3 million compared to USD 9.8 million in the corresponding quarter of the previous year. As a result, the balance of incomes on direct investments increased by 91.1 percent and reached USD 102.0 million.

In the reporting period, there was increase in payments of interests on earlier received loans by 56.8 percent (up to USD 17.9 million), primarily due to increase of payments on public loans. It contributed to increase in the deficit of “incomes from other investments” article by 35.0 percent (up to USD 12.1 million).

In the reporting period, the balance of “remuneration of labor” article formed negative and constituted USD 5.5 million (decline by 23.4 percent). This trend was conditioned by decrease in aggregate incomes of non-residents received from labor activity in the Kyrgyz Republic.

TRANSFERS

The positive balance of **current transfers** according to the results of the first quarter of 2013 reached another high and constituted USD 399.6 million, having increased by 14.1 percent as compared to the corresponding period of the last year.

The core role in the current transfers account is still belongs to **the private transfers** (neutral presentation of the balance of payment), net inflow thereof increased by 14.1 percent and amounted to USD 400.3 million.

Aforementioned growth was provided by inflow of workers’ remittances, which occupy 97.1 percent of the total private transfers received. Transfers under this article continue growing: net inflow of the workers’ remittances amounted to USD 386.9 million, having increased by 11.5 percent as compared to the first quarter of 2012.

Table 15. Structure of workers' remittances

(in millions of US dollars)

	I'09	I'10	I'11	I'12	I'13
1.1 Workers' remittances	162,8	213,1	292,4	346,9	386,9
1.1.1 Inflow	178,8	234,1	331,5	398,2	460,6

<i>Inflows through transfer systems</i>	160,8	211,3	301,8	363,8	423,0
<i>Transfers of individuals through commercial banks</i> ¹	2,2	2,3	2,1	1,9	1,6
<i>Postal populations' remittances</i>	0,9	1,1	1,1	1,0	0,8
<i>Estimates of NBKR</i> ²	14,8	19,4	26,6	31,5	35,2
1.1.2 Outflow	-16,0	-21,0	-39,1	-51,3	-73,7

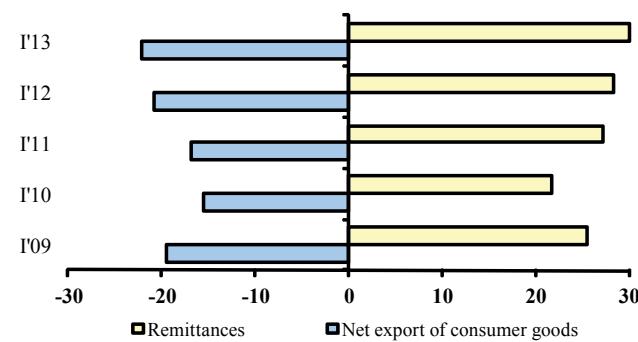

^{*} excluding estimates of NBKR¹ Remittances exceeding 3000 US dollar are not taken into account² Additional estimation coefficient of 10% is used for assessing remittances which migrants inflow in cash

The main channel for inflows of the workers' remittances to the republic is the range of transfer systems⁹ (91.8 percent of the total inflows). In the reporting period, net inflow through transfer systems increased by 11.8 percent, having reached USD 351.2 million¹⁰. At that, the geographical structure of money transfers remains the same. According to the results of the first three months of the current year, the major share of remittances was received from the Russian Federation (97.3 percent). The share of other countries is much lower: 1.2 percent of remittances were received from Kazakhstan, 0.9 percent – from the USA. In the structure of remittances transferred from the Kyrgyz Republic, the dominant share is occupied by Russia (97.6 percent).

Remittances remain the major source of trade deficit financing. The balance of remittances still covers net export of consumer goods, which formed with a negative value in the amount of USD 307.3 million.

Chart 5: Balance of remittances and Net Export of Consumer Goods

in percent of GDP

In the reporting period, the balance of current transfers in the **government sector** (neutral presentation of the balance of payment) remained almost the same as compared to the corresponding index of the first quarter of 2012 and formed with a negative value in the amount of USD 0.8 million.

⁹ Anelik, Blizko, Contact, Migom, MoneyGram, Western Union, Unistream, Zolotaya Korona, Leader, Bystraya Pochta, Allyur and other money transfer systems and remittances via the PE "Kyrgyzpochtasy".

¹⁰ Without additional estimates of the NBKR

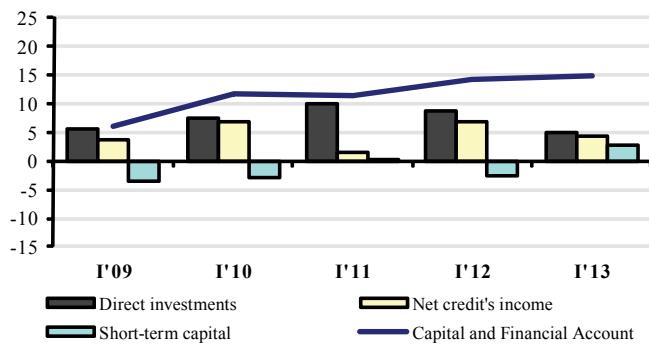

CAPITAL ACCOUNT AND FINANCIAL ACCOUNT

According to the results of the first quarter of 2013, **the balance of the capital account and financial account** formed with a positive value in the amount of USD 235.3 million, having decreased by 5.6 percent as compared to the corresponding index of the base period. At that, decrease in the capital inflow was observed both on the financial account, and on the capital account.

The balance of **the capital account** formed positive in the amount of USD 17.1 million, having decreased by 22.5 percent compared to the level which was reached in the first quarter of the last year. Positive value of the balance was generally conditioned by inflow of other transfers, primarily grants within the framework of the government investments program in the amount of USD 10.5 million, having decreased by 42.7 percent compared to the corresponding period of

Chart 6: Capital and Financial Account

in percent of GDP

ing period¹¹.

The surplus of the **financial account** in the first quarter of 2013 constituted USD 218.2 million, having decreased by 4.0 percent as compared to the base period.

In the reporting quarter, net inflow of **direct investment** constituted USD 91.0 million, meanwhile, in the corresponding period of the previous year, the inflow thereof reached USD 45.5 million (increase by 99.8 percent). Direct investment increased primarily due to growth in the net inflow of reinvested earnings, which increased by 2.1 times and constituted USD 93.7 million. Net outflow on direct investments to other capital decreased from USD 11.4 to 8.4 million, which was primarily conditioned by increase in the inflow of loans provided by foreign co-owners. At that, net inflow of funds invested into stock capital decreased (from USD 13.3 to 5.7 million).

In the reporting period, in the section by types of economic activity the major net inflow of direct investments was observed in the operations with real estate and rent¹², as well as in the financial sector. At that, increase was observed in the net inflow of investments in aforementioned sectors (by 26.0 percent and 3.3 times respectively). Moreover, investment in the enterprises of processing industry decreased by 34.4 percent. In the geographical structure of direct investments the major share of the capital inflow was observed from Canada, Cyprus, Kazakhstan and Great Britain.

In the year under review, the balance of **portfolio investments** formed with a negative value

¹¹ According to the NSC KR, the amount of the migrants to the foreign countries constituted 7 487 people (1 010 people in January-March 2012).

¹² According to the classification of the NSC KR, this group includes exploration works.

and constituted USD 4.0 million, while the corresponding index was positive in 2011 (USD 5.6 million). Outflow of funds was conditioned by decrease in the requirements of foreign investors for stock capital of the banking sector.

Net volume of **other investments**, attracted to the republic in the reporting quarter of the current year constituted USD 131.6 million, having decreased by 25.5 percent as compared to the index of the base period.

According to the results of the first quarter of 2013, the residents' assets increased by USD 75.8 million, meanwhile they decreased by USD 52.8 million in the corresponding quarter of the last year. At that, the major share of growth was provided by increase of the residents' accounts receivable by USD 48.5 million. As at the end of the first quarter of 2013, generally, more than 82.1 percent of the gross volume of accounts receivable¹³ was accounted for the enterprises of processing sector, enterprises carrying out operations with real estate, rent and rendering services to the consumers, as well as companies operating in the sphere of trade and repair works.

Moreover, increase in the residents' assets, placed onto their accounts in the foreign banks was observed in the reporting period (by USD 18.6 million). It should be noted, that more than 90.0 percent of the total cash balance on the accounts of the enterprises outside their national territory accounts for the enterprises of the industrial sector¹⁴.

In the reporting period, liabilities on other investments to the external world increased by USD 207.3 million. Growth of liabilities was conditioned by increase in accounts payable and attraction of loans by the public sector.

Net inflow of external loans amounts to USD 64.2 million. At that, net inflow of loans received by the public sector amounted to USD 72.8 million, and net outflow of funds was observed on the loans provided to the private sector in the amount of USD 8.7 million. At that, it should be noted that all volume of loans attracted by the public sector was provided within the public investments program from the non-CIS countries (USD 80.4 million). Payments on principal amount of debt under the loans provided earlier constituted USD 7.5 million (USD 7.3 million in the first quarter of 2012). The volume of payments on servicing loans received by the private sector earlier amounted to USD 53.0 million, while inflow of loan proceeds decreased from USD 101.1 million in the base period to USD 44.4 million in January-March 2013.

In the reporting period, the accounts payable of resident enterprises increased by USD 139.5 million. Generally, the main share in the total volume of accounts payable is occupied by the enterprises operating in the sphere of trade and repair works, processing sector, transport and communication, which constitute 71.4 percent of the total amount of accounts payable¹⁵.

According to the results of the first quarter of 2013, the total balance of payment formed positive in the amount of USD 19.7 million.

¹³ Excluding debt of direct foreign investors to the resident enterprises of the Kyrgyz Republic.

¹⁴ As of April 1, 2013.

¹⁵ Excluding debt of resident enterprises to the direct foreign investors.

BOX

In 2011, the Kyrgyz Republic concluded an agreement on debt forgiveness with the Republic of Turkey.

According to the Balance of Payment Manual of the IMF (5th edition), *debt forgiveness* (debt cancellation) is the voluntary cancellation of part or all of a debt specified by a contractual agreement between a creditor in one economy and a debtor in another economy that is experiencing balance of payment difficulties. Debt forgiveness is one of types of debt restructuring and it contributes to budget savings as well as international reserves replenishment of the lending country, the Kyrgyz Republic in this particular case, however, it eases the load on the balance of payment by means of reducing liabilities on the loan servicing.

In the balance of payment debt forgiveness is considered as:

- ✓ receipt of capital transfers onto the capital account (credit);
- ✓ decrease of liabilities on other investments in the financial account (debit).

Republic of Turkey

Agreement	“Agreement on writing off debt between the governments of the Kyrgyz Republic and the Republic of Turkey”
Date of conclusion	December 1, 2011
Effective date	October 4, 2012
Amount	USD 49.2 million
Terms and conditions	The principal amount shall be written off, as well as interest and overdue payments on interest, which shall be repaid under the restructuring agreements dated March 9, 2006 and February 23, 2010, between the government of the Kyrgyz Republic and Turkey Export and Import Bank.

The amount of USD 49.2 million written off by the Republic of Turkey was recorded in the balance of payment of the Kyrgyz Republic for the fourth quarter of 2012 (see publication “Balance of payment of the Kyrgyz Republic for 2012”). In case the agreement on writing off debt had not been signed the payments on servicing the loan of the Republic of Turkey would amount to approximately USD 2.4 million per annum till 2038 inclusive.

The “**errors and omissions**” article was positive in the amount of USD 272.6 million. Positive value of this article indicates incomplete statistical coverage of operations with capital inflows to the country. Currently, for the purposes of decrease in the index of aforementioned article, the National Bank carries out activities on statistical coverage improvement of the balance of payment indices.

Gross international reserves at the end of March 2013 constituted USD 2 044.0 million, which covers 3.6 months of the future import of goods and services.

Comment:

* including the allocation of SDR between the IMF countries-members to support their balance of payments had the impact on the value of foreign liabilities. As a result, the liabilities of the Kyrgyz Republic increased by US\$ 132.2 billion. Long-term investments are investments in financial assets, whose initial maturity was set up, in compliance with a contract, as more than one year or has never been stipulated Short-term investment are investments in financial assets, with maturity of one year or less than one year, pursuant to contract, or paid as short notice
